

## IMPORTANT NOTIFICATION

### **Pancreta Bank Production API Portal has been activated**

According to 14/3/2019 New Payment Services Directive 2 – PSD2, Pancreta Bank S.A. has exposed its payment services through a secure transaction portal and has activated a production environment of digital banking services called **Pancreta API Portal**. Pancreta API Portal can be accessed directly by our partners at <https://apiportal.pancretabank.gr>.

This service enables qualified Third Party Providers – TPPs (such as information service providers and payment service providers) to acquire customers' financial data, either personal or business accounts, debit cards and initiate transactions, enabling customers to use the service more often.

The purpose of collaboration between banks and TPPs is to create safe innovative products by using information on explicit customer consent.

Pancreta Bank S.A. aims to ensure cheaper, safer and more innovative informational services and electronic transactions through Pancreta API Portal.
